New Vision, New Discoveries

Advancing Glover Island From an Historic Gold Deposit to the Next High-Impact New Discovery in a Rapidly Growing Top-Tier Mining District

Galloper Gold President and CEO
Hratch Jabrayan

September 3, 2025

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of applicable securities laws. The use of any of the words “anticipate”, “plan”, “continue”, “expect”, “estimate”, “objective”, “may”, “will”, “project”, “should”, “predict”, “potential” and similar expressions are intended to identify forward-looking statements. Although the Company believes that the expectations and assumptions on which the forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because the Company cannot give any assurance that they will prove correct. Since forward-looking statements address future events and conditions, they involve inherent assumptions, risks and uncertainties. Actual results could differ materially from those currently anticipated due to a number of assumptions, factors and risks. These assumptions and risks include, but are not limited to, assumptions and risks associated with mineral exploration generally, risks related to capital markets, risks related to the state of financial markets or future metals prices and the other risks described in the Company’s publicly filed disclosure. Management has provided the above summary of risks and assumptions related to forward-looking statements in this presentation in order to provide readers with a more comprehensive perspective on the Company’s future operations. The Company’s actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits the Company will derive from them. These forward-looking statements are made as of the date of this presentation, and, other than as required by applicable securities laws, the Company disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise. Neither the Canadian Securities Exchange nor its Regulation Services Provider accepts responsibility for the adequacy or accuracy of this presentation.

Other

This corporate presentation does not constitute a recommendation to buy or sell any securities. Investors should consult with a licensed financial adviser before making any investment decisions.

Qualified Person

The technical information in this presentation has been reviewed and approved by Mr. Peter Lauder, Director of Galloper Gold. Mr. Lauder is the Qualified Person responsible for the scientific and technical information contained herein under National Instrument 43-101 standards.

Gold & Copper: ***The Right Commodities at The Right Time!***

Gold is consistently hitting new record highs and is expected to continue to benefit from Federal Reserve monetary easing, emerging market buying and rising geopolitical tensions. With the need for new high-grade discoveries in Canada and elsewhere is greater than ever, investor interest is keenly focused on companies in favorable jurisdictions with known resources and strong management teams.

Copper is another key investment theme in 2025. Despite a sharp pullback from its highs in 2024, the metal's primary bull cycle remains intact with strong support around \$4.00 (U.S.) per pound. Analysts expect Copper to drive a low-carbon future with demand expected to outstrip supply over the coming years.

Newfoundland:

*Consistently among the top-ranked mining jurisdictions in the world
in the Fraser Institute's Annual Survey of Mining Companies*

Hratch Jabrayan
CEO, Galloper Gold

"We have put together a best-in-class team to accelerate the extraordinary discovery opportunity at Glover Island and differentiate Galloper Gold in the junior sector."

New Vision, New Discoveries

Galloper's fresh approach at Glover Island, featuring an historic gold deposit in a rapidly expanding mining region of Newfoundland, is led by global mining executive Hratch Jabrayan.

Hratch became Galloper's President and CEO in September 2024.

- ✓ ***High-impact CEO and a fresh face on the public markets side of the junior gold sector***
- ✓ ***Accomplished, high-energy and values-driven business leader with a proven track record of bottom-line success and operational growth***
- ✓ ***More than two decades of high-level leadership in the global resource sector including 7 years with Dundee Precious Metals***

Western Newfoundland

Gold And Copper Belts

Glover Island

Newfoundland's Next High-Impact Discovery

Glover Island Highlights:

- ✓ **Large-scale discovery opportunities** within a property package that extends 36 km along northeast trending mineralized structures (separate gold and copper trends)
- ✓ **Galloper has been awarded the previously** provincially-held claims highlighted by a historic gold resource over a small footprint
- ✓ **Geological setting** is in very favorable terrane along the regional Baie-Verte Brompton Line-Cabot Fault Zone (BCZ), a major boundary between the Humber and Dunnage Zones
- ✓ **Targeted deposit types:** Structurally controlled orogenic gold as well as copper-gold-enriched VMS
- ✓ Galloper Gold full intends on implementing a robust and aggressive drill program on Glover Island in Q4, 2025

Results from 2024 (Q4), from Galloper's first-ever drilling at Glover Island in a 6-km step-out from known historic deposit have delivered very favorable results, comparable to the historical 43-101 resource

Multi-km-long copper anomaly (soils, VTEM, mag) along previously unexplored western side of Glover Island

Glover Island

Western Newfoundland

~122 sq. km

LPSE Deposit

Galloper Gold Claims,
including the 43-101
resource LPSE (EML)

*The property (EML) covers an area of 1,926 hectares
and contains a 43-101 resource with a minimum of
~178,800oz. Au indicated and inferred*

Lunch Pond South Extension (EML)

✓ **LPSE Highlights:**

- ✓ 178,800 Au Lunch Pond South Extension
- ✓ 0.5g/t Au cut-off open-pit mine design with a 1.72g/t Au average within 993,000 indicated resource, and with a 1.59g/t average within a 1,703,000t inferred resource.
- ✓ 2.0g/t Au cut-off underground mine design with a 2.99g/t Au average with a 36,000 indicated resource, and with a 2.78g/t Au average within a 373,000t inferred resource

Glover Island, Newfoundland

Hratch Jabrayan

CEO, Galloper Gold on Glover Island
at Lucky Smoke where Galloper
Completed its 6-hole drill program
in late 2024

Gold exploration in 2024 was successful in finding higher-grade mineralization at surface than previously documented, Surface values were determined to be as high as 11g/t in hand specimen. Adjacent surface trenched areas have historic reporting of mineable grades at Keystone and Tomahawk showings.”
Drilling at Lucky Smoke in 2024 intersected mineralization wider than projections in historic drillholes. The orebody continues deeper than previously understood, and it has significant along-strike and down-dip potential. Lucky Smoke warrants further significant amounts of drilling and study
Important intersections include:

15 m @ 2.62 g/t Au, including 1 m @ 18.79 g/t Au, starting at a downhole length of 137 m in LS24-02”
3.80 m @ 6.92 g/t Au starting 146.5 m downhole in LS-24-04, above 23.5 m @ 0.72 g/t Au beginning just 32.5 m from surface”
4 m @ 4.59 g/t Au within 21.50 m @ 1.26 g/t Au from 117 m to 144.5 m in LS-24-06

Glover Island: Overburden

A key strategy to unlocking the potential of Glover Island is to evaluate the continuous horizon bearing mineralization along the length of the Island. Historical prospectors on the Island focused on the abundant outcrop in the “Lunch Pond” area, carrying out about 10,000m of drilling (which ended in 2012) and delineating a significant gold zone over a relatively small footprint. Galloper controls the full length of the mineralized horizon.

Glover Island: Power Lines

The Newfoundland power grid extends onto Glover Island in the northern part of the property, key infrastructure critical to any future potential resource development. Access to the island is relatively easy, by barge or helicopter.

*** TSX Listed DPM Metals is Galloper Gold’s Largest Shareholder**

Mint Pond: Property Quick Facts

Location: 22 km south of Gander, approximately 20 km SE of New Found Gold's Keats Zone.

Size: 125 sq. km - property package extends west-east for as much as 15 km.

Geological Setting: Located in the prospective Gander tectonic zone immediately east of the GRUB Line, a major fluid conduit linked to the Central Newfoundland Gold Belt.

Exploration Target: Structurally controlled orogenic gold mineralization and base metal potential. No previous systematic exploration had ever been carried out at Mint Pond prior to Galloper's 2022 work program due to very limited outcrop exposure.

Early Success: Highly encouraging reconnaissance soil sampling completed in 2022 and 2023 revealed multiple gold anomalies, and some base metal anomalies, crossing major lithological contacts and fault zones on the property. Anomalous gold values are clustered in the north-central, northwestern and southeastern parts of the property. Major and minor faults, delineated by a successful Galloper LiDAR Survey and a review of regional magnetic data, are interpreted to be prone to focus orogenic, Au-bearing fluids.

Next Steps: Additional prospecting, mapping and sampling are required to outline potential first-ever drill targets. If soil anomalies are reflected in the bedrock, Mint Pond could rapidly emerge as an exciting new grassroots discovery in the heart of an increasingly important gold district.

Mint Pond

Soil Sampling Results

July 2022

- LiDAR Survey

May - July 2022

- GroundTruth Exploration conducts Soil Sampling Program (1,132 total samples)

May 2023

- GroundTruth Exploration Soil Sampling Program (1,613 total samples)

Mint Pond Gold (Au) Assays 2022-23

Mint Pond Copper (Cu) Assays 2022-23

Never previously explored, Mint Pond has the potential to emerge as an exciting new grassroots gold and/or base metals discovery following Galloper's 2022-2023 work programs. Initial soil sampling revealed anomalous gold and copper values in clusters across the property, highly encouraging when also combined with data from Galloper's LiDAR Survey and regional magnetic surveys.

Leadership Team

Hratch Jabrayan
Chief Executive Officer/Director

Mr. Hratch Jabrayan, Galloper's newly-appointed CEO, is an accomplished, high-energy and values-driven business leader with a proven track record of operational growth, efficiency, bottom-line success, and wealth creation with resource and non-resource entities in North America and around the world. He brings more than two decades of high-level resource sector experience to Galloper, including 7 years with Dundee Precious Metals where he advanced the company's interests in Armenia and globally.

Bryan Loree
Chief Financial Officer

Mr. Loree has held senior accounting roles for public and private companies in various industries including renewable energy, exploration, and construction. Prior to entering the accounting field, Mr. Loree gained experience as an investor relations manager. He holds a Certified Management Accountant designation, a Financial Management Diploma from the British Columbia Institute of Technology, and a BA from Simon Fraser University.

Bryan Sparrow, P.Geo.
Vice President Geology and Exploration

Mr. Sparrow has 20 years of experience in Newfoundland and Labrador across various geoscientific disciplines in mining, mineral exploration, and geotechnical analysis. He has a successful track record of geoscientific data analysis and integration within the natural resources industry. He has well-developed project management and leadership abilities at various stages of implementation, with development initiatives hitting targeted outcomes. He holds a B.Sc. (Hons) from Memorial University in Newfoundland.

Bryan is a Professional Geoscientist registered in Newfoundland and Labrador.

Bill de Jong, Lawyer
Corporate Legal Counsel/Securities Specialist

Mr. de Jong is a capital markets specialist in the areas of securities (regulatory and stock exchange compliance), mergers and acquisitions, and corporate finance, working with both investment banks and issuers. He is experienced as both in-house counsel and as a corporate development professional for publicly listed companies, and as a director for multiple public, private and not-for-profit entities.

Jan Urata
Corporate Secretary

Jan Urata is the Founder and President of Take It Public Services Inc. since 2011, a highly motivated legal support service for top tier and junior issuers in a variety of industry sectors. She is well versed in taking corporate entities from initial seed capital stage to publicly listed status. Her services include corporate secretarial to regulatory filings to complex transactions while offering corporate sustainability through cost-effective, efficient and timely services.

Board of Directors

Hratch Jabrayan
Chief Executive Officer/Director

Mr. Hratch Jabrayan, Galloper's newly-appointed CEO, is an accomplished, high-energy and values-driven business leader with a proven track record of operational growth, efficiency, bottom-line success, and wealth creation with resource and non-resource entities in North America and around the world. He brings more than two decades of high-level resource sector experience to Galloper, including 7 years with Dundee Precious Metals where he advanced the company's interests in Armenia and globally.

Peter Lauder, P.Geo.
Director

Mr. Lauder is a senior level mine and exploration geologist with more than 20 years' experience (Goldcorp, IAMGOLD and BHP Canada) in the design, implementation and management of underground and surface exploration projects. He has managed all aspects of mining and exploration projects from early to advance stage, to full production with emphasis on safety and process driven exploration leading to successful resource estimation and project development.

Dr. Iliya Garkov
Director

Dr. Garkov is the Executive Vice-President and Chief Operating Officer for Dundee Precious Metals (TSX: DPM). He has over three decades of international mining experience in Bulgaria, Australia and Armenia. Since 2003, when DPM acquired its assets in Bulgaria, he has held a number of leadership roles within the company and was appointed to his current position in February 2024, helping grow the Toronto-based producer's profitability and its market capitalization to approximately \$2.5 billion. Dr. Garkov has a PhD in mining engineering from the University of Mining and Geology St. Ivan Rilski in Bulgaria and is a graduate of the London Business School Senior Executive Program

Board of Directors

Stephen Robert Shea

*FCPA, FCA, MBA, BSc, ICD.d
Director*

Mr. Shea is a courageous and pragmatic leader with integrity. He has a broad base of functional and industry experience with public companies complemented by excellent people skills and EQ. The foundation of his approach to problem solving is rooted in the scientific method from his undergraduate degree in neurophysiology.

As Managing Partner, Talent at Ernst & Young, he was a critical member of the Canadian Firm's Executive Committee for more than decade until his retirement in 2022. EY Canada is an integrated professional services firm with more than 400 partners, 6,500 professionals and revenue more than \$1.5 billion.

Importantly, as a Global Client Coordinating and Consulting Partner in the resource sector, he led the EY's integrated client service delivery for several years to major companies such as Barrick Gold Corporation and Irving Oil. Earlier in his career he was an audit partner.

As a young professional in the audit practice, he served the gold mining industry working with the Dome Mines Group which eventually evolved into Barrick Gold Corporation. This experience included working with exploration stage projects, new mine construction (Detour Lake) and acquisitions.

He has served on numerous internal boards and committees and as a Board Member in the not-for-profit sector throughout and after his career at EY. Since retiring from the firm, he continues to serve on two not-for-profit boards and provide consulting services to private sector clients.

Souren Sarkissov

Director

Mr. Sarkissov is a well-known Toronto based entrepreneur and investor with more than 25 years of dedication to the growth and management of various privately held companies. His extensive business background reflects a strong commitment to building successful enterprises from ground up and guiding them to substantial growth.

Souren has played a pivotal role in launching several businesses, guiding them from inception to becoming multi-million-dollar enterprises. His leadership and vision have been key drivers to the success of various endeavors. He currently serves as Chairman of the Board of a privately held multi-national Oil and Gas company is the Chief Executive Officers of a Toronto based enterprise.

Mr. Sarkissov holds a master's degree in electrical engineering and is actively engaged in the mining and business communities in Toronto.
