Galloper Gold Issues Update on Exploration Activities in Preparation for 2026 Drilling Program

VANCOUVER, British Columbia, June 22, 2026 - Galloper Gold Corp. (CSE: **BOOM**; OTC: **GGDCF**) (the “Company” or “Galloper”) is pleased to announce that the pre-season construction and renovation phase of Galloper’s exploration program is approaching maturation with the Kettle Pond Camp nearing completion for operations as the basecamp for exploration on Glover Island. The 2026 Glover Island exploration program is targeting up to 7000m of drilling on Glover Island.

Mr. Bryan Sparrow, VP of Exploration for Galloper Gold commented “The Kettle Pond Camp [seen above] is nearing completion with beginning operations for the Glover Island exploration program to follow. All major upgrades including new electrical capacity which include 3 new generators [seen above] at 75kw capacity will be online within the next week. The facilities are a build-for-purpose exploration basecamp from which historic exploration activities from 2010 onwards led to the 2012 Lunch Pond South Extension Mineral Resource Estimate. Galloper intends a robust drilling program in 2026, with mobilization operations for equipment to begin in short order in a staged and cost-effective process. Once operational, Galloper intends to significantly increase the resource of the LPSE Deposit building on our recent and substantial update - the 2026 LPSE MRE. The Kettle Pond Camp will allow for year-round operations via helicopter, and seasonal access via float plane and boat.”

The technical information contained herein has been reviewed and approved by Mr. Bryan Sparrow, P.Geo., Vice President of Exploration for Galloper Gold.
